PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of experience building responsive and enterprise web applications using **React.js, JavaScript, TypeScript, Redux Toolkit and REST APIs**. Experienced in developing reusable UI components, integrating frontend applications with backend services, implementing role-based access control, and optimizing data-intensive applications for performance. Additional hands-on experience with **Next.js, Node.js, Express.js and SQL**, and local **AI and RAG-based applications**.

TECHNICAL SKILLS

Frontend Development: React.js, Next.js, JavaScript (ES6+), TypeScript, Redux Toolkit, Context API, HTML5, CSS3, Tailwind CSS, Material UI
Backend & APIs: Node.js, Express.js, REST APIs, Server-Sent Events (SSE), JWT, Role-Based Access Control (RBAC), TanStack Query
Databases: MySQL, PostgreSQL, Pinecone Vector DB
Tools & Practices: Git, GitHub, Postman, VS Code, JIRA, Agile/Scrum
AI Technologies: Hugging Face Transformers, Groq, Local RAG

WORK EXPERIENCE

FRONTEND DEVELOPER — Navi Mumbai, MH
Sublime Technocorp Pvt Ltd — Oct 2025 – Jun 2026

- Developed **20+ reusable React.js components** for an enterprise digital signage platform supporting **50+ enterprise accounts**.
- Implemented client-side **Role-Based Access Control (RBAC)** across 3 permission tiers to restrict unauthorized platform views.
- Integrated React.js interfaces with an **Express.js backend** and resolved **15+ critical UI issues** during production maintenance.
- Developed reusable frontend functionality for enterprise workflows with a focus on maintainability and consistent user experience.

CAREER BREAK — Prayagraj, UP
Family Responsibilities & Bereavement Leave — Feb 2025 – Sep 2025

- Took a career break to support family responsibilities and provide full-time care for my late father.
- Continued technical development during the break through **advanced React.js, JavaScript, and Data Structures & Algorithms**, while building an **Energy Monitoring Desktop Application** using Electron and React.js.

SOLUTION ANALYST — Thane, Mumbai, MH
Sankey Business Solutions Pvt Ltd — Apr 2022 – Jan 2025

- Maintained and enhanced an enterprise **Field Service Management platform** supporting up to **200 concurrent users**.
- Developed dynamic data tables with permission-driven controls, rendering **1,000+ data rows without lag** and contributing to a **20% improvement** in field-work-order dispatching.
- Designed a validation algorithm requiring photographic proof for task completion, ensuring real-time verification for **500+ daily field work orders** and reducing manual audit time by **30%**.
- Optimized complex SQL execution plans, joins and indexing, reducing query execution time by **50%** and bringing load times from **10 seconds to 5 seconds**.
- Worked on enterprise application enhancements involving frontend functionality, data handling, permissions and performance optimization.

TECHNICAL PROJECTS

Personal AI Research Assistant (Production-Grade RAG System)

- Created a local RAG platform capable of processing **PDFs up to 10MB** and generating citation-backed answers from extracted semantic information.
- Moved heavy document-processing tasks to **Node.js worker threads**, preventing event-loop blockage during large PDF uploads.
- Integrated an **8-bit quantized embedding model** to decrease server memory usage by **70%**, maintaining application stability on a 512MB RAM cloud tier.
- Implemented a dual-lane queue scheduler that processes **50KB documents in under 2 seconds**, even while 10MB files run in the background.

Enterprise Digital Signage Platform

- Constructed interactive scheduling dashboards for **50+ distributors**, streamlining media playlist management and **reducing content delivery delays by 40%**.
- Built a dynamic form component now used in 1**0+ screens** across Lead, Order, and Customer management, streamlining data entry for **100+ daily users**.

Energy Monitoring Desktop Application

- Built a cross-platform desktop application using **Electron, React.js, and Express.js** to monitor and visualize real-time energy consumption and system telemetry.
- Integrated **WebSocket-based real-time communication** to stream live electrical parameters including **voltage, current, power, and frequency** from connected monitoring devices.
- Implemented **interactive dashboards and data visualizations** to provide real-time insights into energy consumption and system performance.
- Integrated **MySQL** for local data persistence and historical energy-monitoring data, enabling users to analyze device-level consumption and operational metrics.

EDUCATION

Bachelor of Science (B.Sc.) — Jul 2020 – Jun 2023
Govind Singh Smarak Degree College — 64.94%

Diploma in Computer Science & Engineering — Jul 2016 – Jun 2019
Government Polytechnic, Jaunpur — 72.70%

ACCOMPLISHMENTS

Honors & Awards:

- Zinspire Award (Jul 2024) for delivering critical change requests.
- Client Appreciation (Apr 2024) for high-priority delivery.

Certifications:

- JavaScript Algorithms & Data Structures (freeCodeCamp).
- Back End Development & APIs (freeCodeCamp).
- Responsive Web Design (freeCodeCamp).
